# The Integration of Energy Through Coherence and Congruency and its Impact in Water

Carlos Orozco, Claudia Sanson, Almut Gössler

### Abstract:

Water is essential for life as it carries information through communication and thus resonance. As demonstrated by Masaru Emoto and Prof Bernd Kropelin water has memory and it shapes as water crystals. The key to coherence was tested for its potential to form water crystals in a Quantum Morphic Field, as well as forming a water crystal when the key of Coherence exposed to water. The experiments were done at the Hado Institute in Tokyo Japan by Hiro Emoto. The Biowell developed by Konstantin Korotkov was used to test the impact of the Key to Coherence with regards to its ability to influence the human biofield and the shape and position of chakras.

### Background:

We are surrounded by water; there is a popular belief that the human body and planet Earth are made of 75% water. According to Gerald Pollack these percentages are very conservative, as he postulates that both the human body and our planet are made of 99% water. In other words we are water. In the book entitled Siddhartha by Herman Hesse, we can read the following when Siddhartha is talking to Vasudeva: "You have learnt that the secret of the river is precious. The river is everywhere at once, from its origin or root to its mouth, in the waterfalls, in the currents, in the oceans, in the mountains, in the clouds, because its essence is in the water that forms it all and it is all". Nature uses water as the perfect example for the unification of energy.

Hydrogen and Oxygen combined form water, the word Hydrogen comes from the Greek Hydr and gen and French gène, Hydr which means water and gène which means producing. Therefore we have an example of unification as Hydrogen and Oxygen are unified in an amazing molecule that sustains life on planet Earth, the molecule is water: H<sub>2</sub>O.

In nature 99.9% of its essence is water. We now know that the fourth phase of water determined by the EZ zone could well allow for the diversity of life on planet Earth, that includes the Animalia, the Plantae, the Fungi, the Monera and the Protista kingdoms, due to the biophotons and their interaction with the molecule of water as H<sub>3</sub>O<sub>2</sub>.

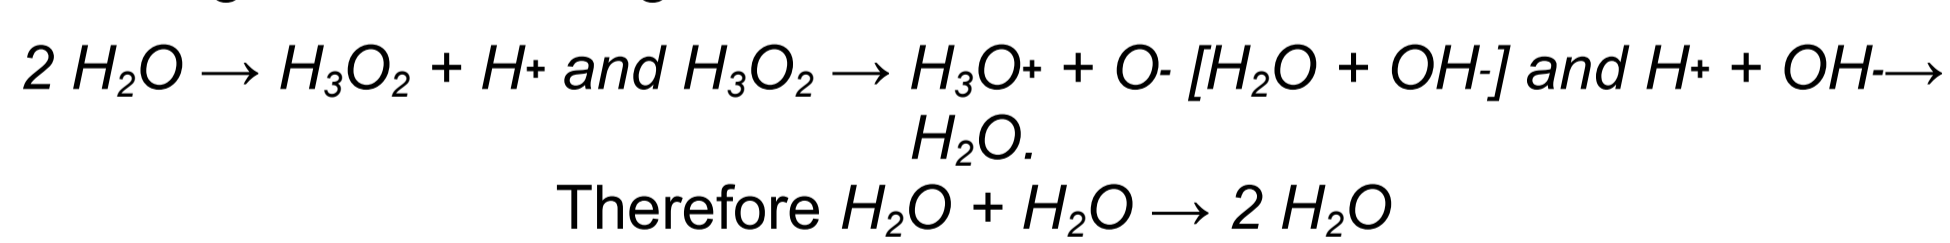

According to table 1, number 1 is harmony 2 is duality 3 is stability, 4 is communication and 5 is gratefulness. The word Oxygen comes from the Greek Oxys meaning sharp acid, and French gène which means producing or creating. As shown in table 1 Oxygen seats in position 8 as it has 8 protons in its nucleus and number 8 has the implication of infinity and the significance of perfection. Anything to be infinite it needs to be perfect. The symbol of infinity is an 8 in the horizontal position ∞. Therefore, Oxygen is essential in the process we call life. Numerically according to table 1, Hydrogen is set in position 1 and therefore it represents unification to become water, and thus implies singularity and most importantly it implies harmony.

### Periodic Table of Nature Based on the Periodic Table of Chemical Elements.

Element	Meaning	Implication	Geometry
1. Hydrogen	Unification	Harmony	Dot
2. Helium	Duality	And	Line
3. Lithium	Stability	Trilogy	Triangle
4. Carbon SP <sup>3</sup>	Communication	Resonance	Cuadrangle
5. Borum	Gratitude	Thankfulness	Pentagon
6. Carbon	Isomerism	Star of David	Hexagon
7. Nitrogen	Cycle	Completion	Circle
8. Oxygen	Perfection	Infinity	Octagon
9. Halogen	Foundation	Manifestation	Line and circle
0. Noble Gas	Origin	Beginning	Decimal point

**Table 1. The Periodic Table of Nature:** Every element has an atomic number, every number has an intention (what) an implication (what for) and a meaning (why). This is Coherence. Congruency comes with the geometrical counter part of every number, that integrates this concept.

The principle of duality applies here, and this means we need to have 2 molecules of water to form the real chemical structure of water: H<sub>3</sub>O<sub>2</sub> according to the following reaction:

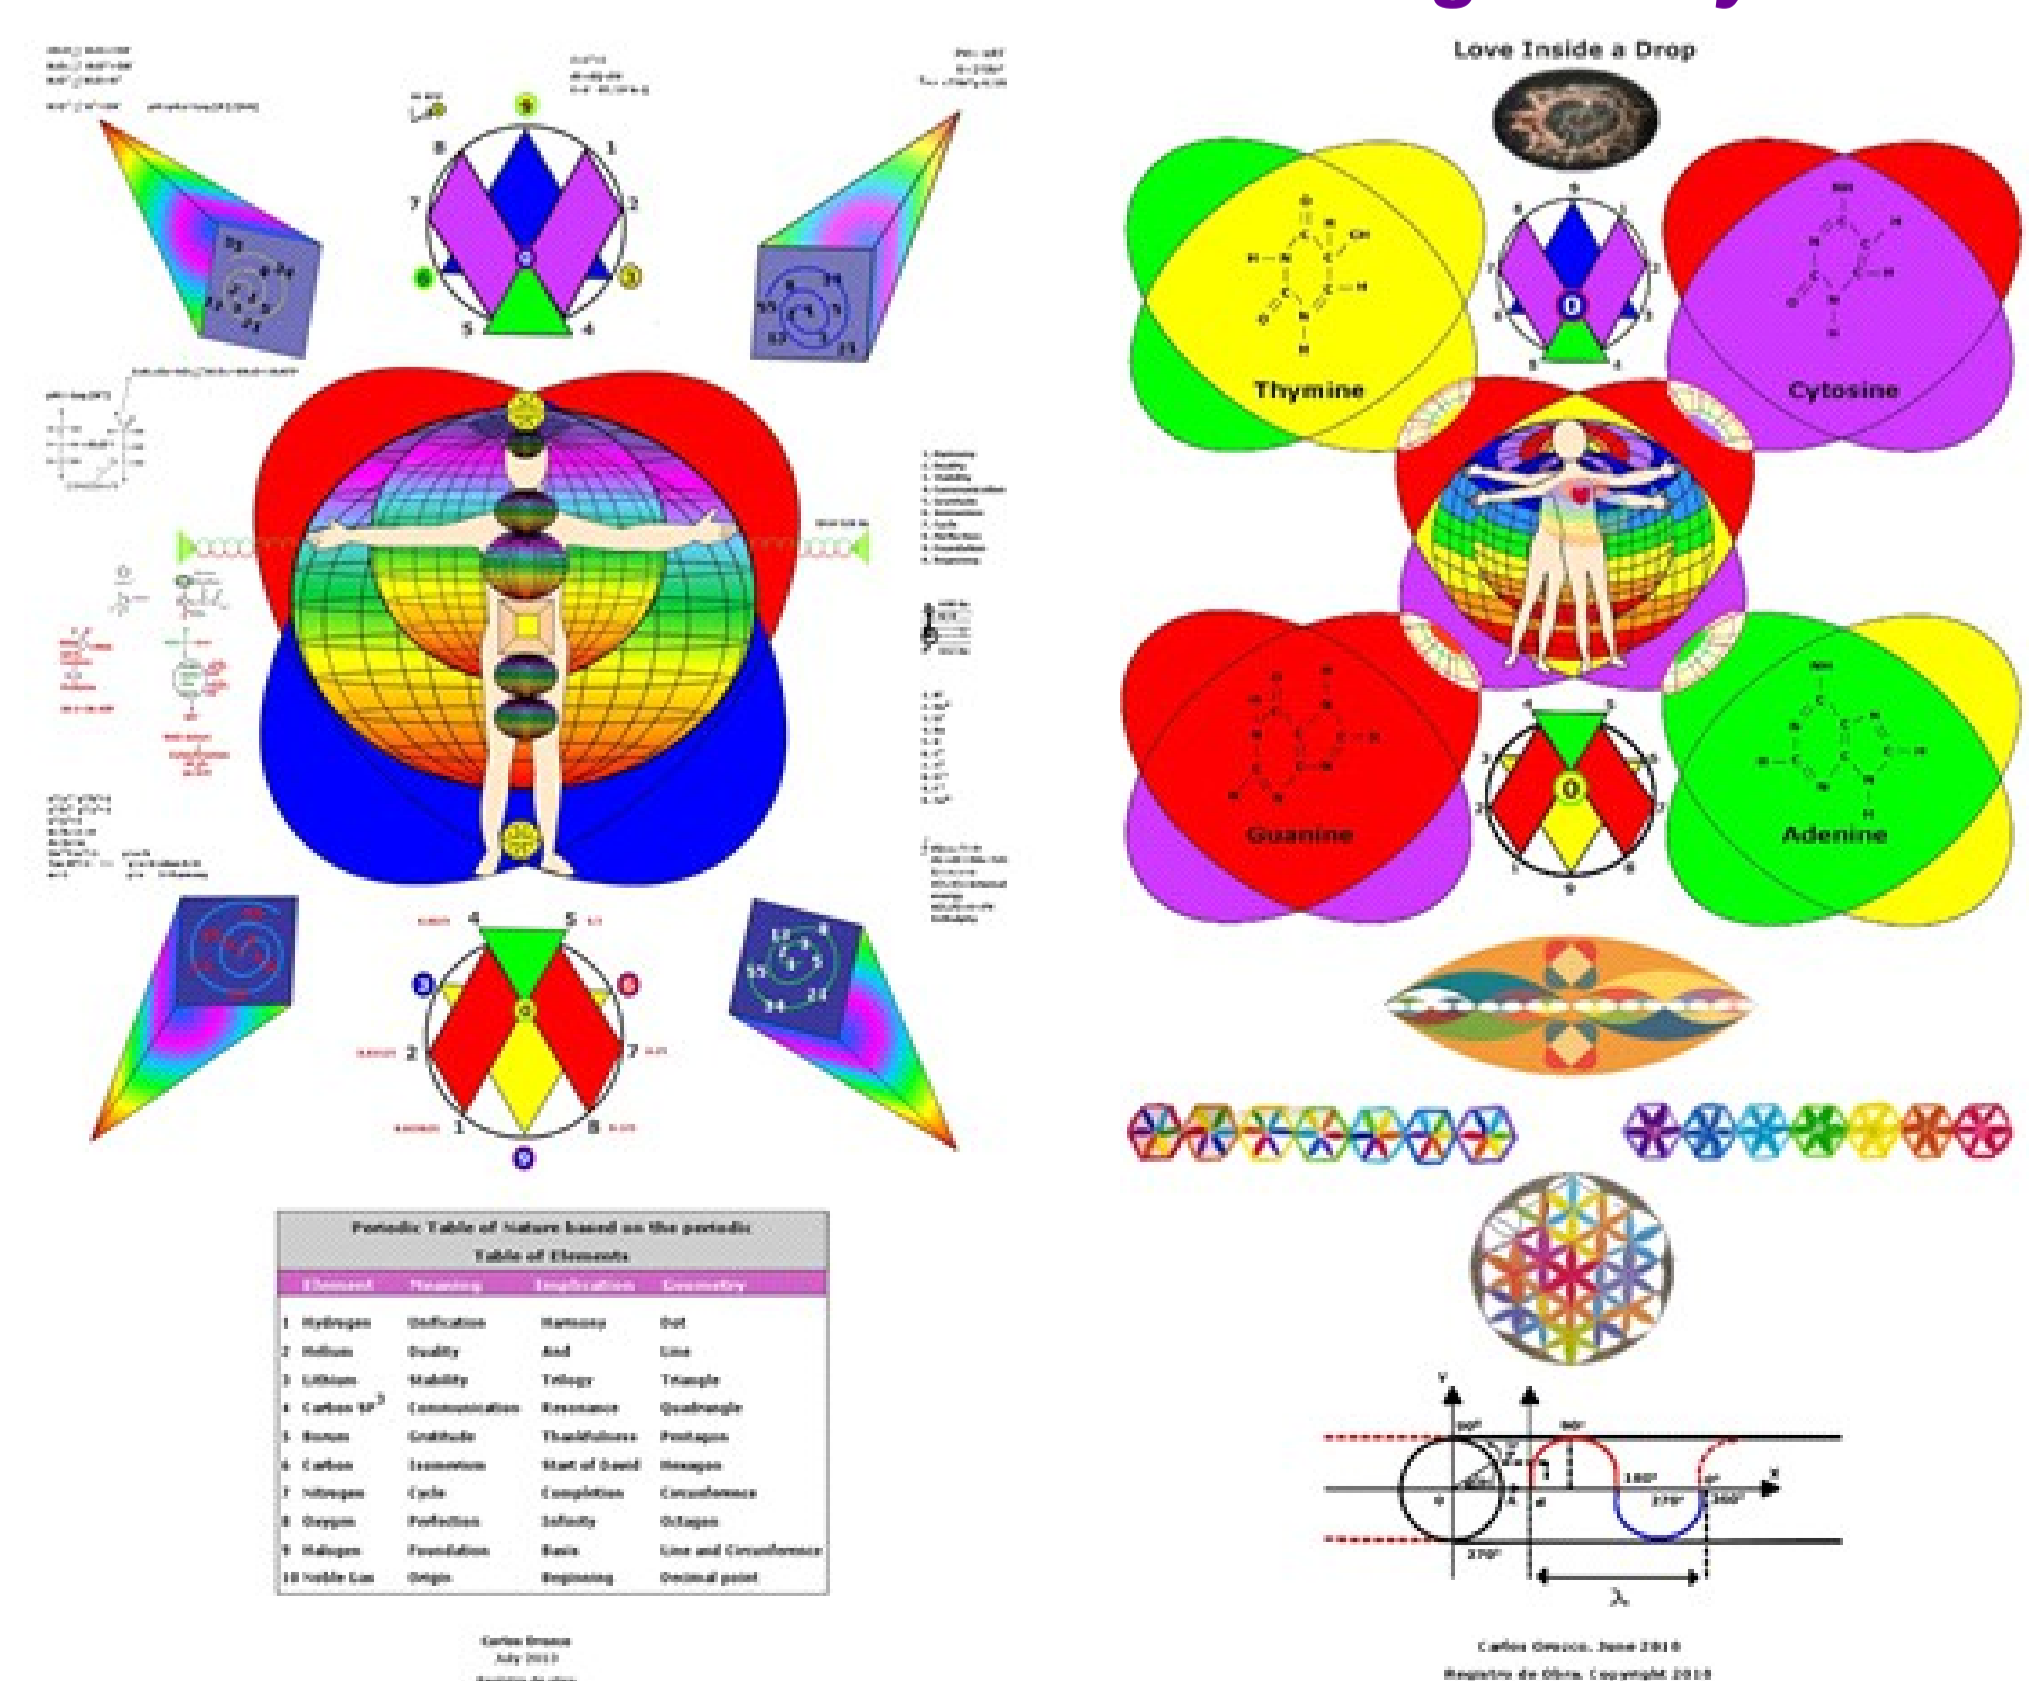

This is known as the auto-polarization of water and defines the water molecule as H<sub>3</sub>O<sub>2</sub> the exclusion zone known as EZ, the fourth phase of water. Polarization is essential for the process of life, and water is a dipole by the process of dissociation resulting in ionization. Therefore, water is essential for unifying the biophysical and biochemical processes integrated in what we call life.

### Results with The Key to Coherence

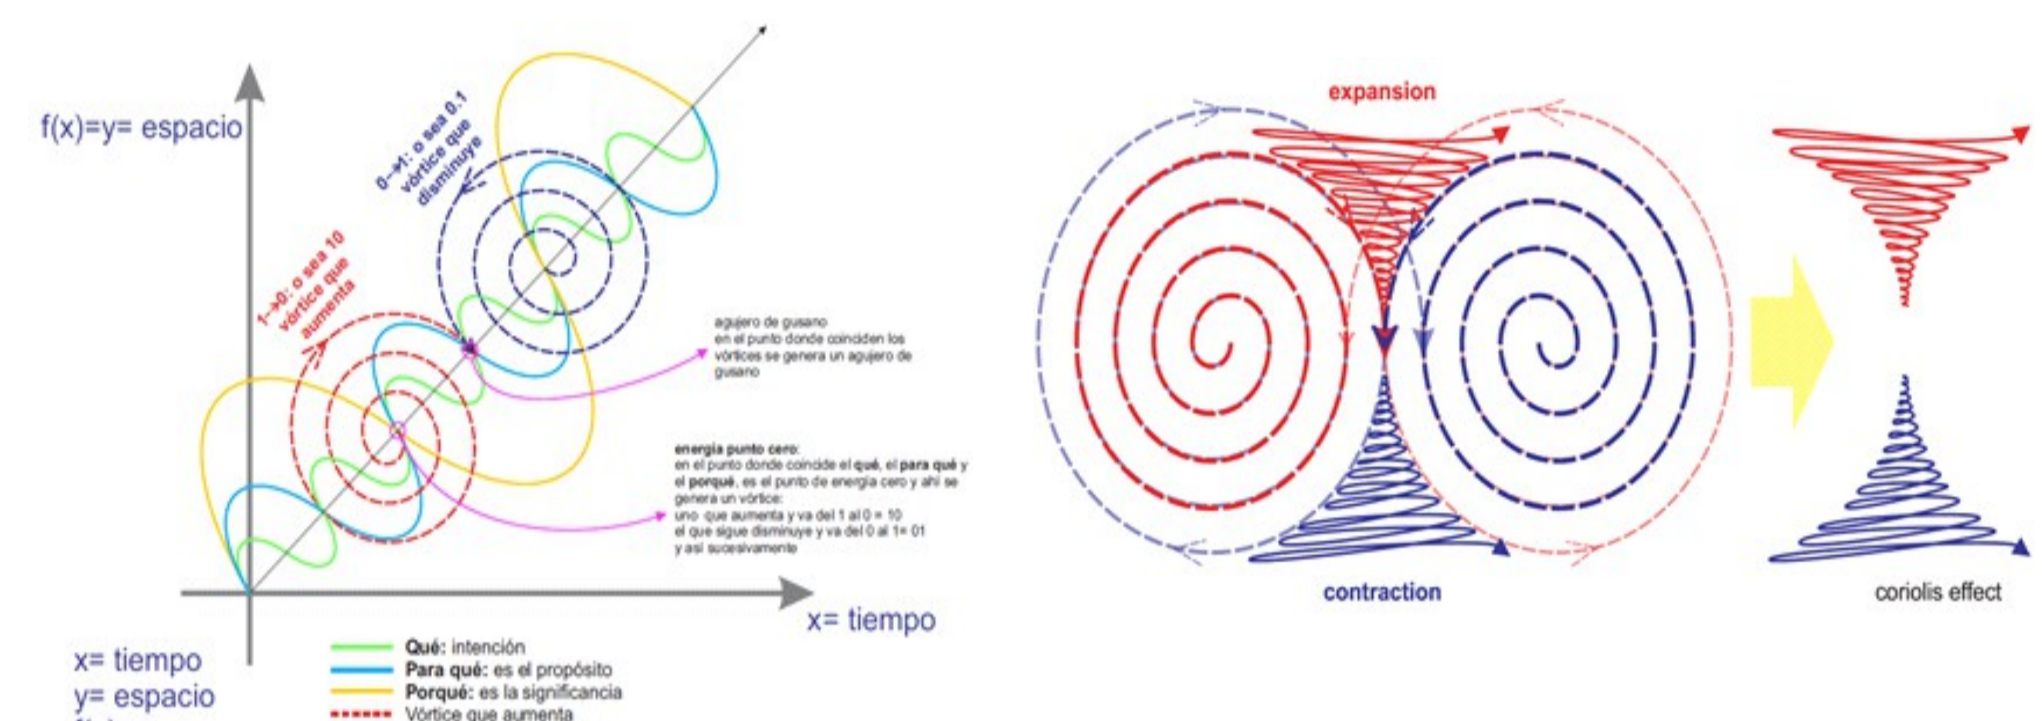

#### Coherence

#### Congruency

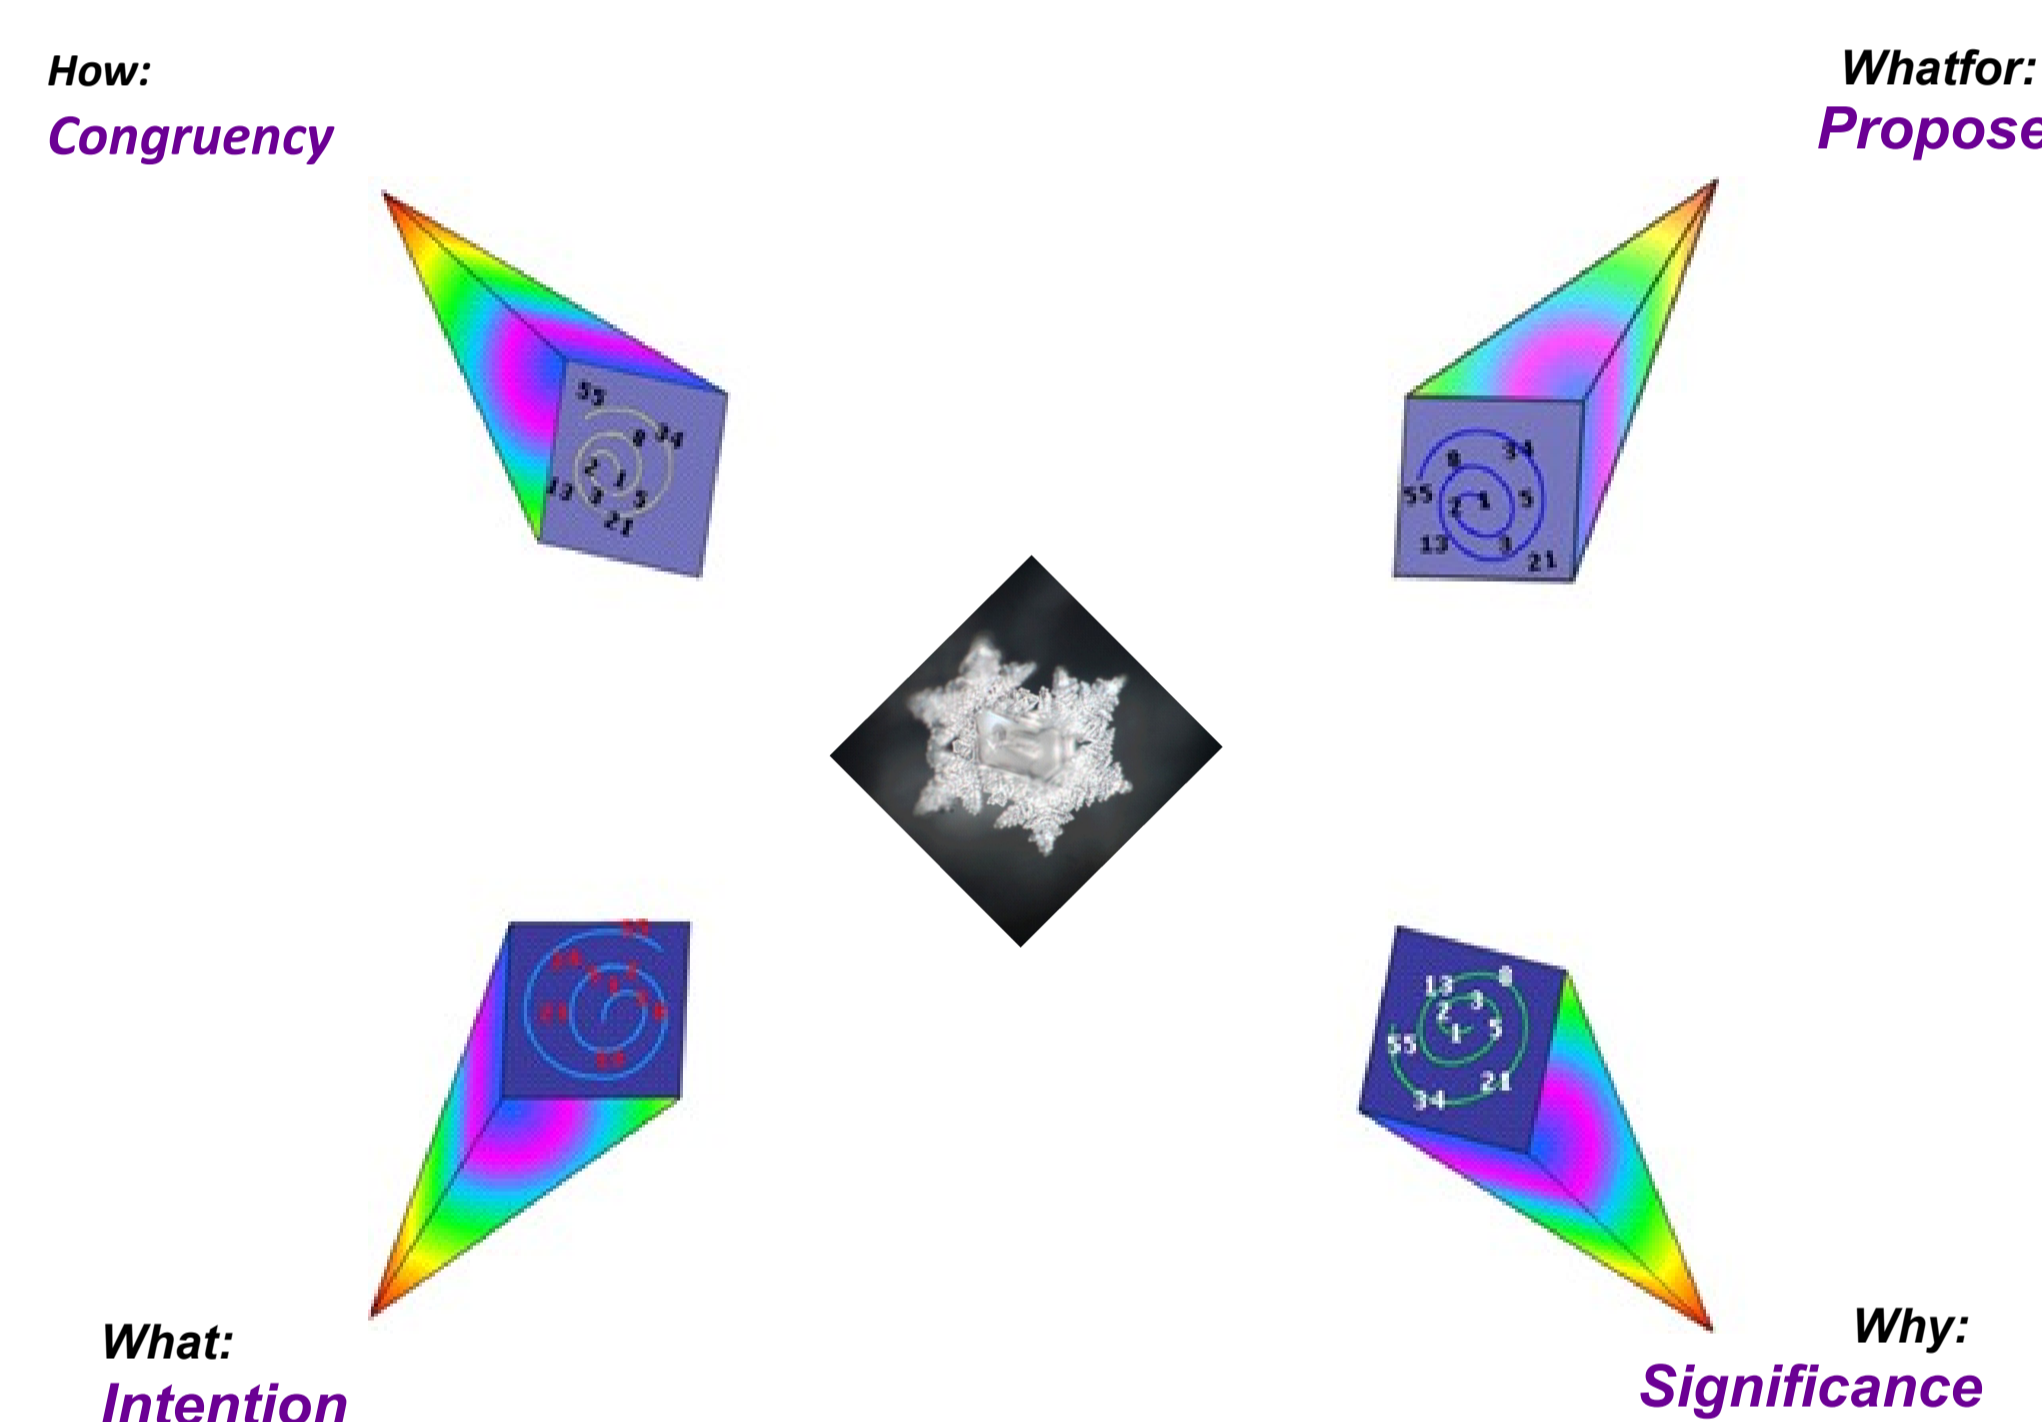

**Figure 1. The Key to Coherence.** The key to coherence is a conductor and a transducer of energy that results in its integration through coherence and congruency. Such integration allows for spinning energy to become vortical energy by means of the flow of information between the biofield otherwise known as the Quantum Morphic Field (QMF) and the intention (WHAT) with purpose (WHAT FOR) and significance (WHY).

The original drawings of each face are shown in figure 1. The coherence face is given by the resonance of the pyramids shown on this face of the key, that form what we call a quantum energy field. A more suitable name is that given by Rupert Sheldrake: Quantum Morphic Field. This is the area where there is manifestation of energy allowing for shapes to form as seen in figure 2. This is a direct consequence of resonance and vibration resulting in communication.

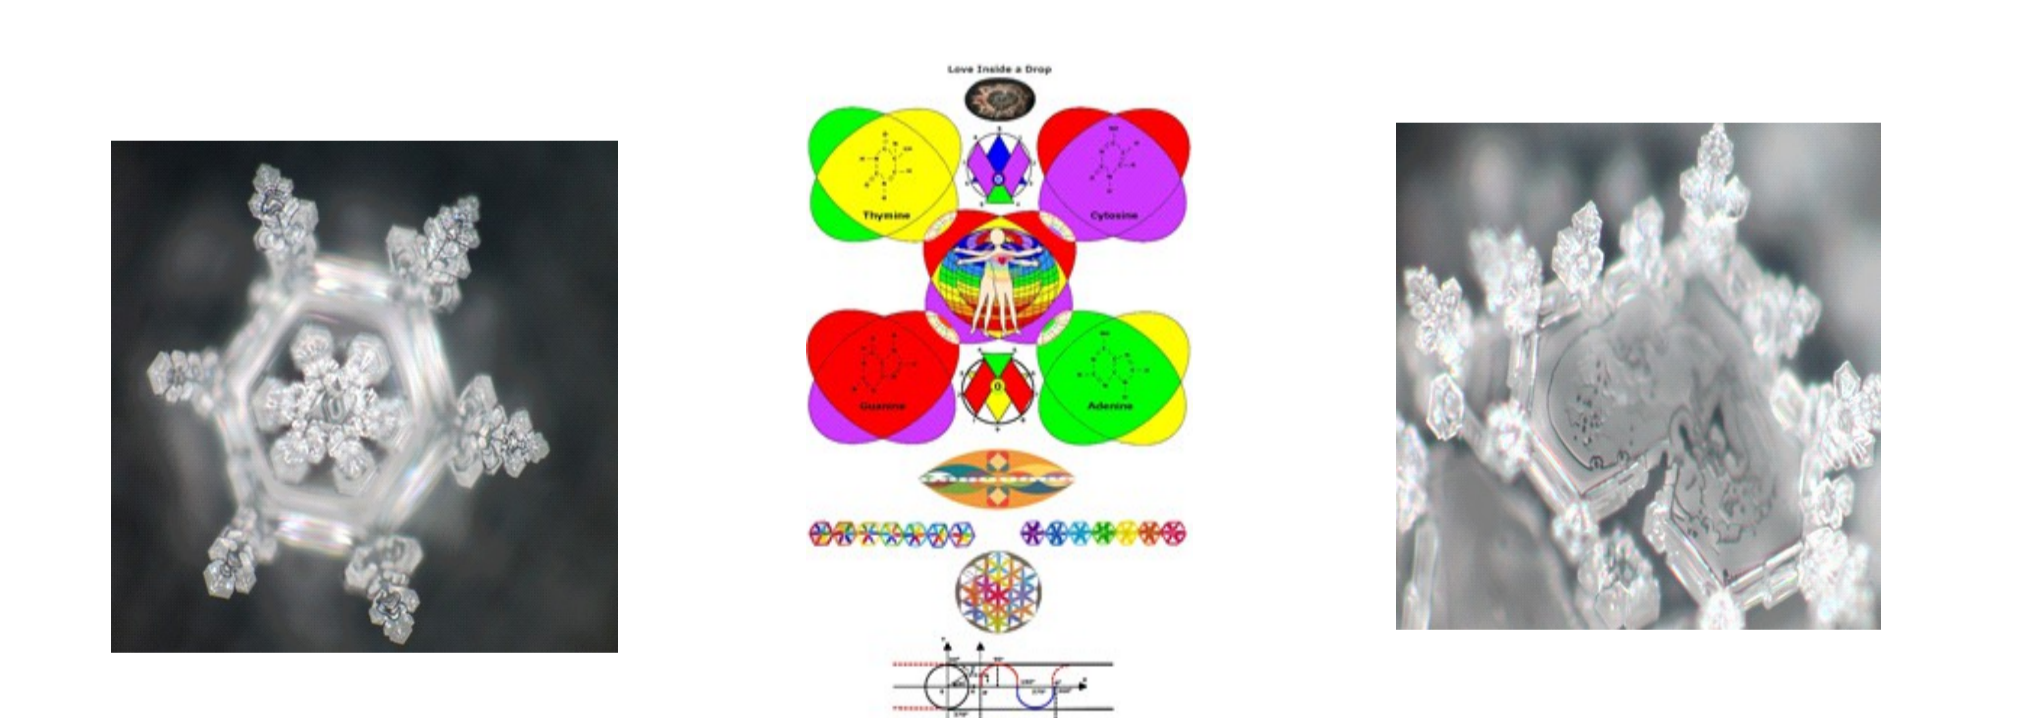

**Figure 2. The Collapse of the electromagnetic wave in the Space-Time Matrix and the Birth of a Vortex.** This phenomenon occurs in the space-time matrix which is the path way of our life. That is, every thing has its place and the right time, that means everything happens in the here (space) and now (time). When an intention is aligned with its purpose and its significance or meaning, an inflexion point is formed that Albert Einstein called the Zero Point Energy, the place where vortices are formed.

**Figure 3. Water Crystal and the Quantum Morphic Field:** This crystal was created by facing the key to coherence towards one of 4 bottles of water for 5 seconds. The bottles of water are represented by the pyramids, as they resonate diagonally across one another. The resulting shape of the water crystal observed mimics that of the Quantum Morphic Field established by the area covered by the 4 pyramids through resonance and communication.

(Photo taken by Hiro Emoto at the Hado Institute in Tokyo Japan in February 2019).

Experiments at the Hado Institute in Tokyo Japan done by Hiro Emoto in February 2019 using the Congruency Face of the Key to Coherence exposed for 5 seconds over a glass of water resulted in the formation of the crystal shown in figure 4. This water crystal is another example of the resonance involved in the process of communication between the informational energy field and the key to coherence.

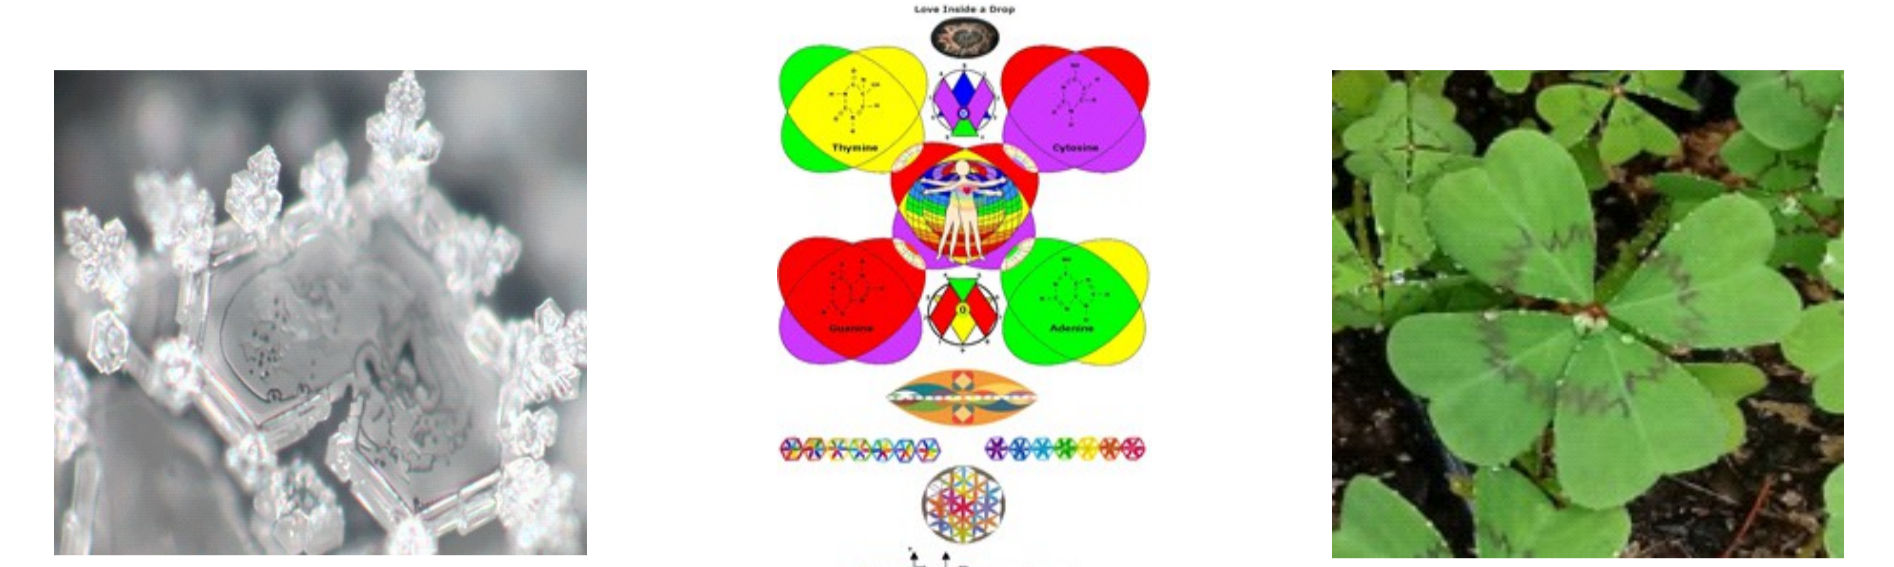

**Figure 4. Water Crystals Generated by the Key to Coherence.** The congruency side of the key was used to energize the tap water contained in a glass. The exposure consisted in placing the Face of Congruency for 5 seconds above to the glass of water. The crystal formed on the right showed morphic resonance as it formed a heart shape as it can be seen.

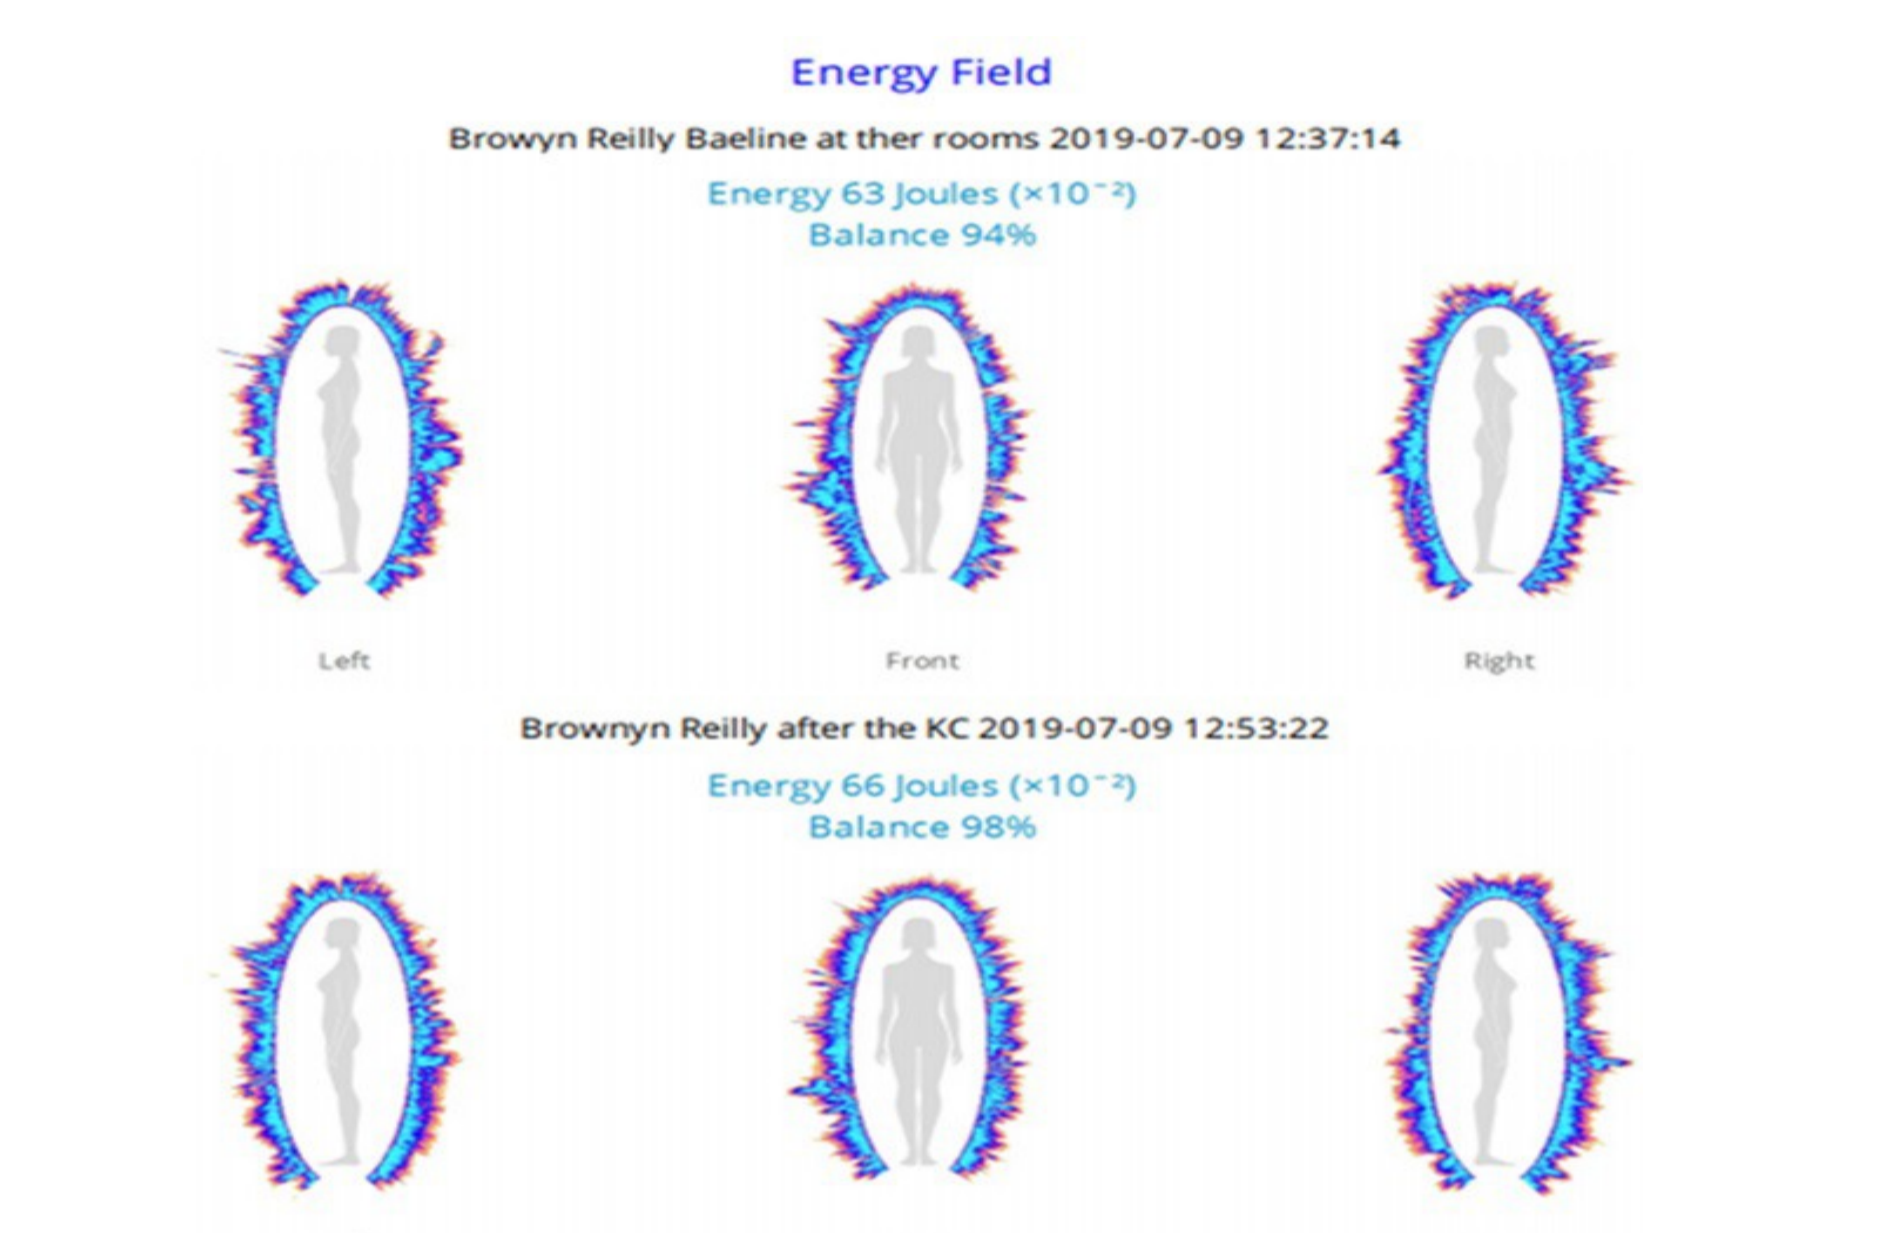

Figure 5 shows what we can say it is the expression of the quantum morphic field through morphic resonance. The unification of energy between coherence and congruency with intention and its resonance with the informational field resulted in the germination of a 4 leaf plant in dried soil. What is interesting in the formation of a double set of 4 heart shaped leaves as well as the symmetry of the leaves compared to the water crystal shown in figure 4. The similarities between the water crystal the geometry of the face of Congruency and the shape of the leaves are remarkable and easily seen.

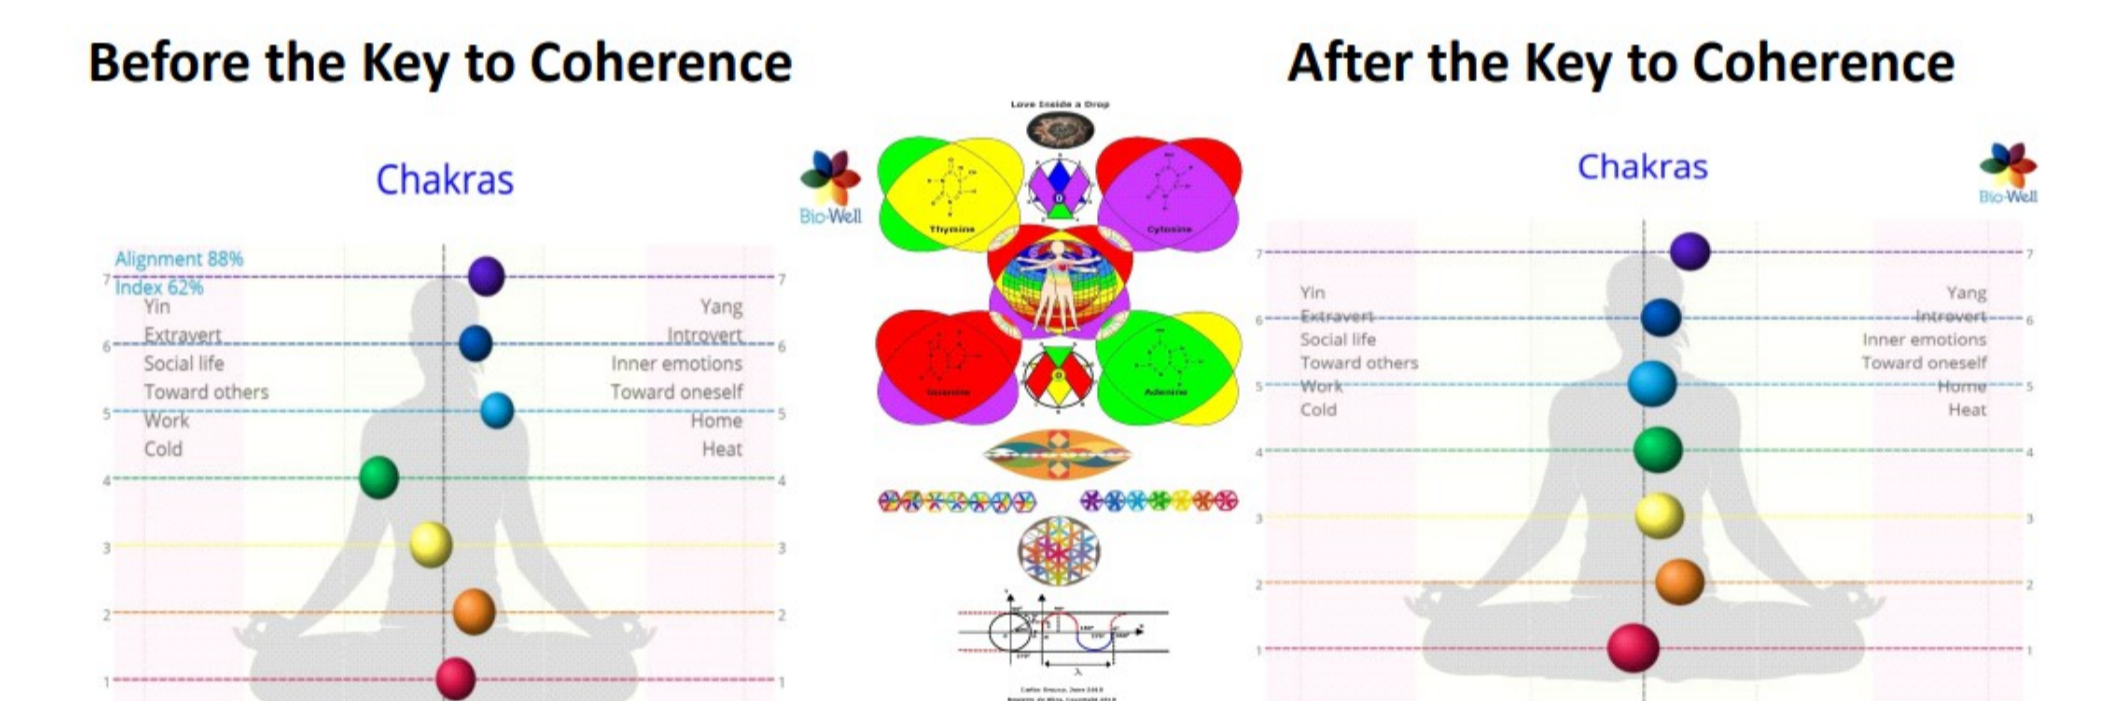

**Figure 5. Effect of the Key to Coherence in Plants Growing in Dried Soil.** A quantum morphic field was set in a property where there had been no rain. The soil was dried. Next to one of the 4 bottles used to set the quantum morphic field a plant germinated and within 2 weeks it spread as seen on the photo to the right.

**Figure 6. Quantum Morphic Resonance.** The shape of the leaves and the shape of the heart shown in the water crystal obtained by exposing the bottle of energized water using the congruency face of the key to coherence is astonishing. There are 4 hearts formed by the leaves of the plant and there are 4 hearts on each corner of the Key to Coherence.

**Figure 7. The Human Energy Field.** These are results before (upper) and after (lower) using the key to coherence in a female client using the Bio-well. The distribution of the energy field improved from a balance of 94% to a balance of 98% increasing the number of Joules X 10<sup>-2</sup> from 63 to 66. This indicates a significant improving in the distribution of the energy field of the subject after using the key to coherence.

**Figure 8. Effect of the Key to Coherence in the Chakras.** The alignment of the chakras occurred within 5 seconds of exposure to the congruency face of the key to coherence.

### Conclusion:

The Key to Coherence is a transducer of energy found in the informational field that resonates with the intention through the power of love. Love is the greatest energy there is and it is the answer to all our needs. The universal symbol of love is the heart, and number 4 as seen on table 1, has the implication of resonance and the significance of communication. Therefore 4 hearts resonate among themselves using the principle of duality, therefore the 16 hearts shown in the congruency face of the Key to Coherence form a quantum morphic field where energy allows for the expression of the intention. The Key to Coherence reminds the body of its natural connection to the energy field with the purpose of life through love and human intention.

### Acknowledgments:

We would like to thank Roberto Alfaro and Rocio Montoya for her support of the last few months and for putting together the information contained in this poster. Our appreciation also goes to Aurora Campusano, Kerrie Martin, Gloria Godinez, Julieta Alonso, Mario Duarte and Carlos Camera, Wayne and Bronwyn Reilly, Barbara and Stan Burzynski, Regine Henschel, as well as to the patients from Hope 4 Cancer and Tony and Marcy Jimenez. Finally, Carlos Orozco would like to thank Sandra Williams for her continuous love and support.
